Patterns in Photography

Patterns are simply repeated shapes, colors or objects

They can be either regular or irregular formations

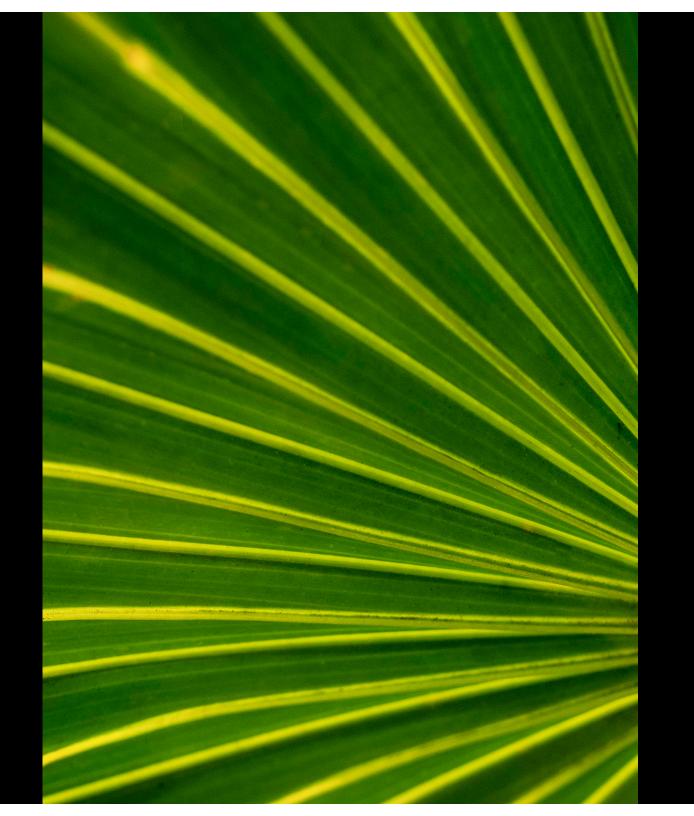

When used effectively, patterns can be very dramatic

The regularity of the arrangement gives it strength

Patterns are found all around us - in nature as well as man-made objects

The key is how to find them and how to use them to our advantage

Patterns in Nature

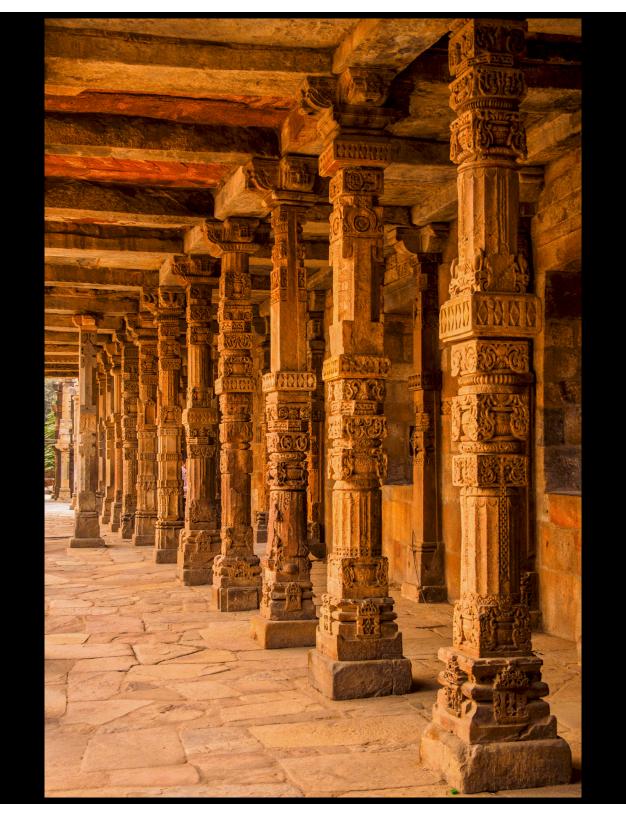

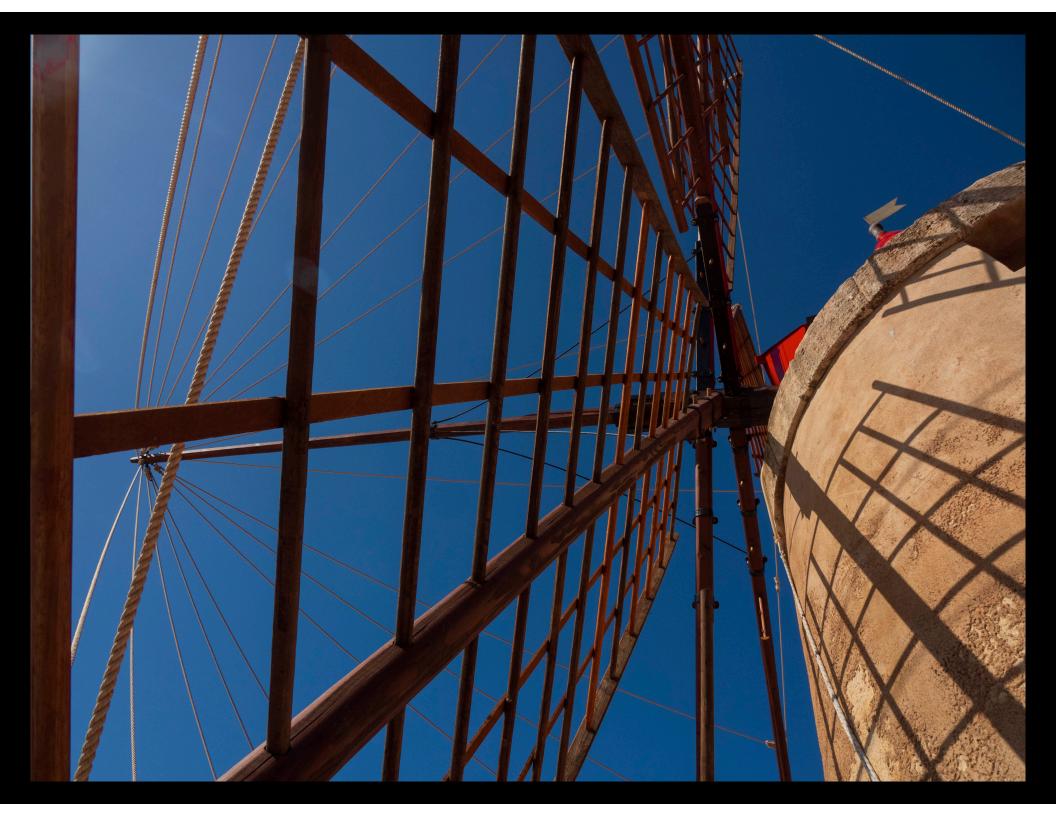

Man-Made Patterns

Patterns Using Shapes

Patterns Using Color

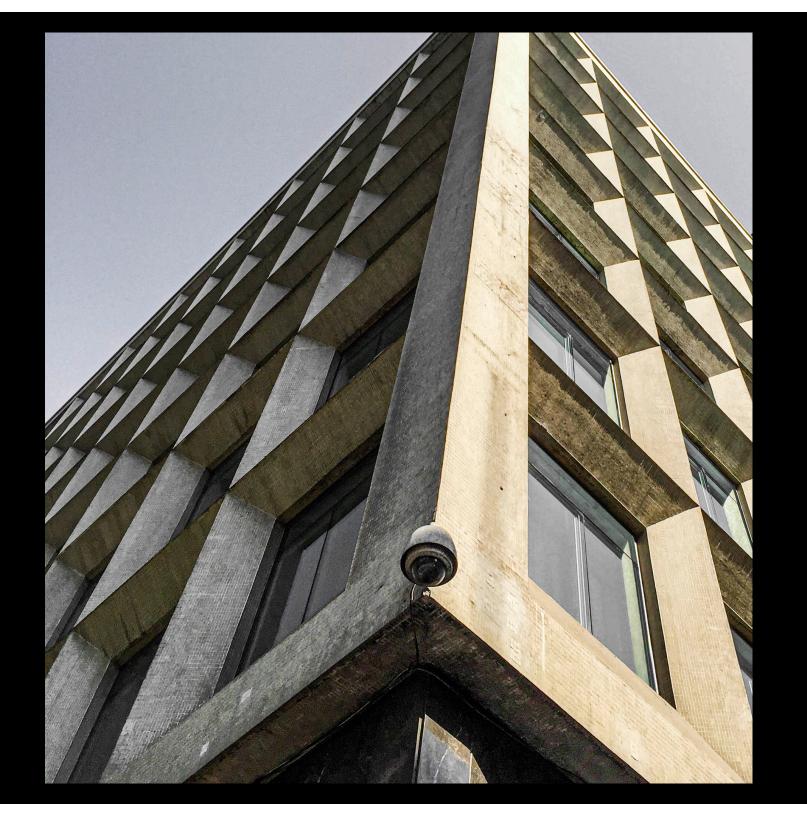

Patterns In Texture

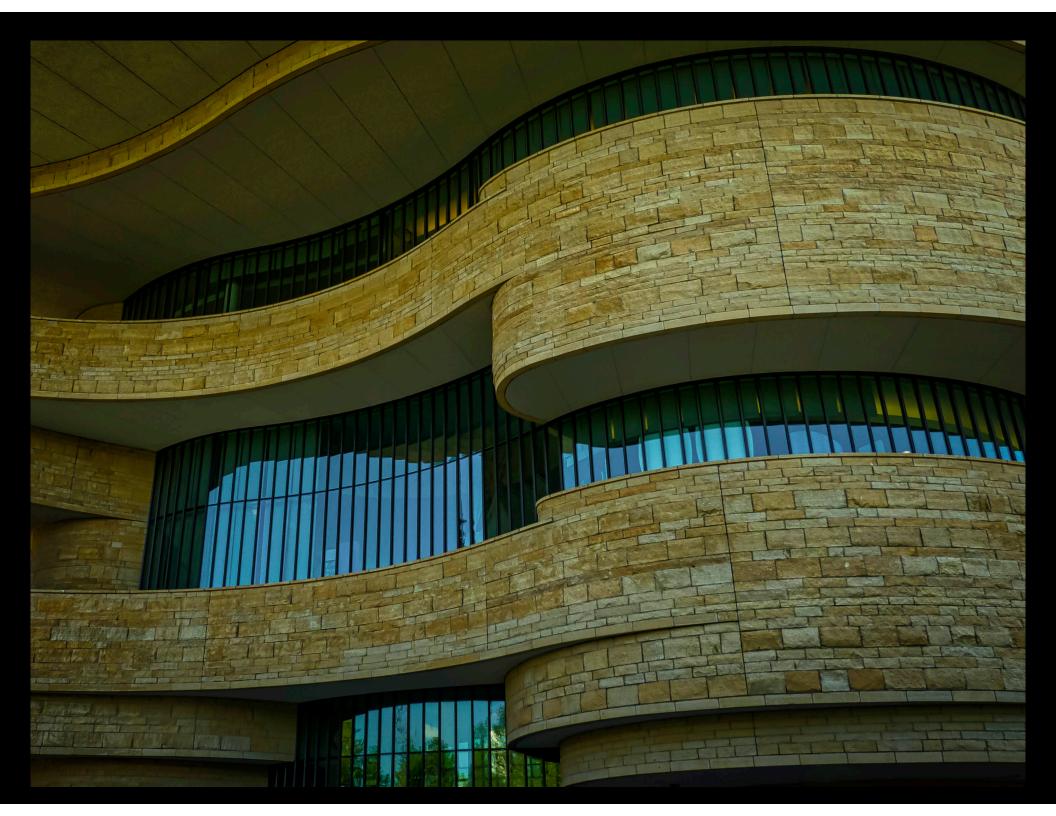

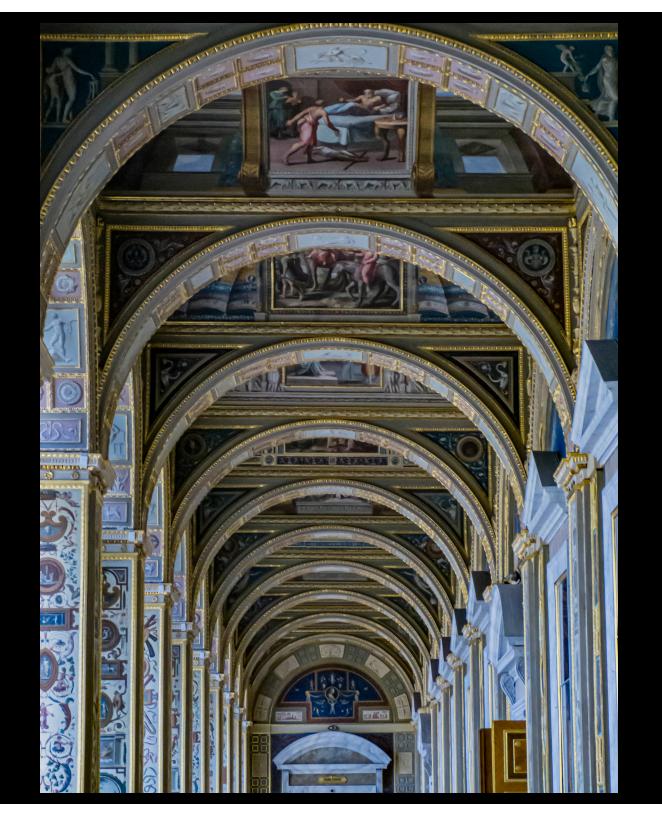

Patterns In Architecture

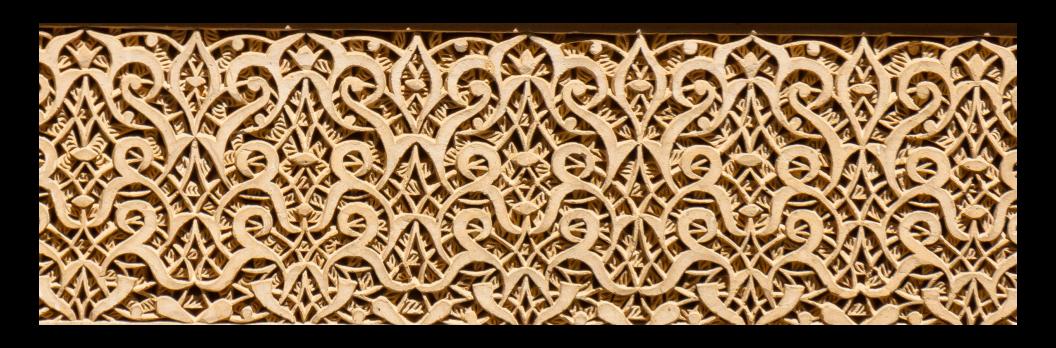

Patterns in Design Details

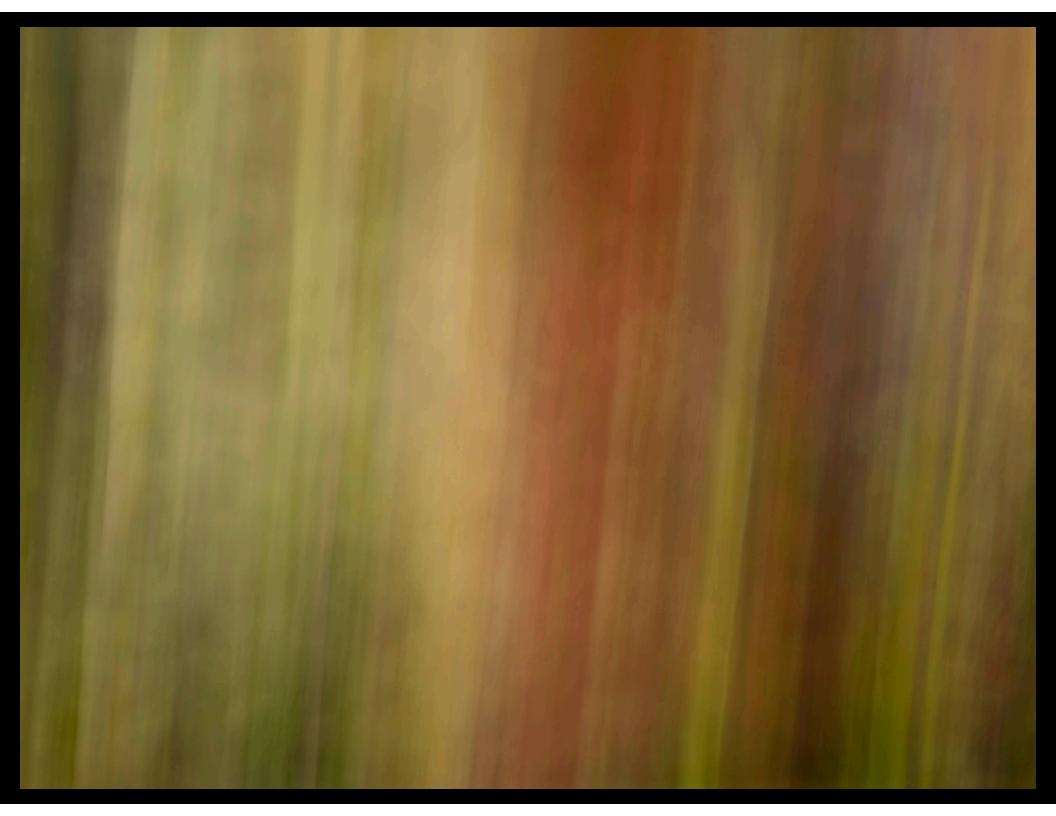

Patterns In Creatures

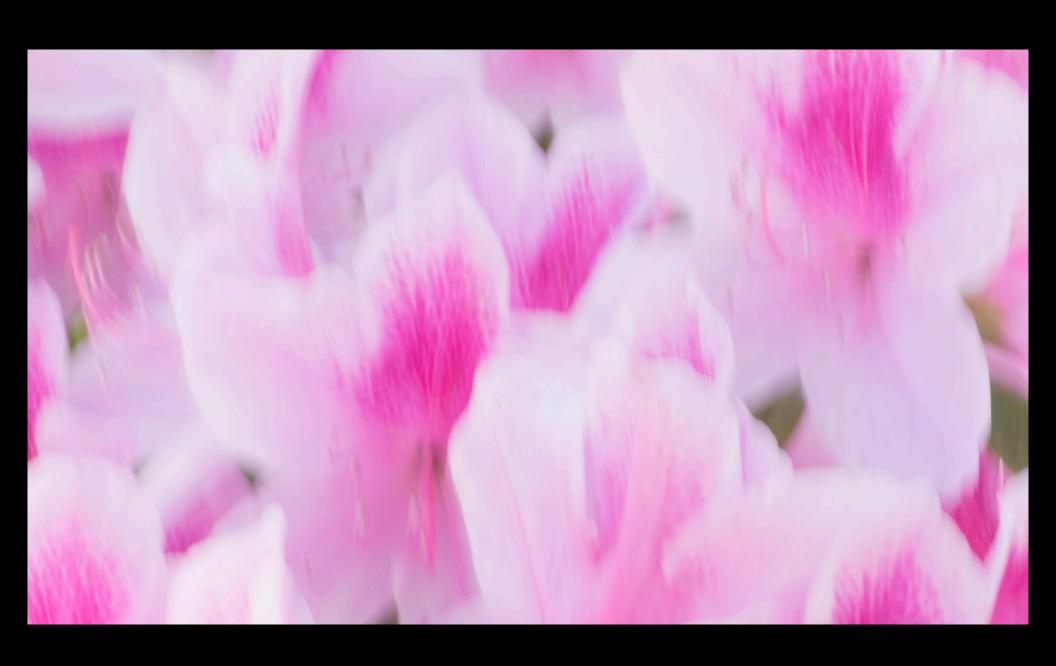

Abstract Patterns

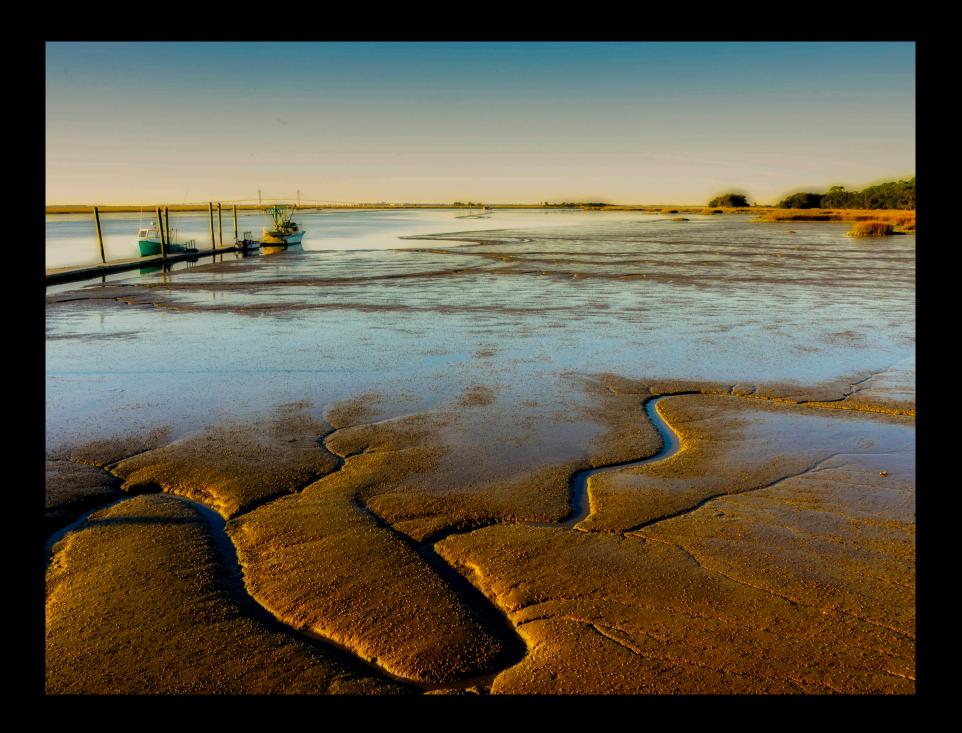

Irregular Patterns

Filling the Frame

Breaking the pattern ...

And, you can even take "Patterns" Literally

Patterns are everywhere! Be creative!
